

Adventures with Computer – Preparatory

Author: **Virgilio Flores Kim**

ISBN: **978-971-0344-67-3**

Copyright: **2007**

Preface:

The **Adventures with Computer for Prep** is the third of the series of preschool books entitled **Adventures with Computer**. The book is well designed to meet the challenging world of computer literacy especially for the preschoolers. It aims to equip the young minds with the knowledge and skills to be able to compete in the age of information technology.

The lessons are well presented and arranged in such a way that the young learners will learn them easily and the illustrations were done artistically to suit the young minds. Different activities were presented to help develop and enhance student skills like coloring, writing, drawing, and identifying.

The book teaches the students the many uses of computer, to identify the main components of a computer system, and how computer works. The book also teaches the young minds on the proper way of using the keyboard and typing technique. At the last portion of the book, a short but simple lesson about Paint introduces the student to graphics application and a preparation for their school.
