

## **Computer Learning for Kids – Preparatory**

Author: **Carlos De Peralta**

ISBN: **978-971-649-167-0**

Copyright: **2007**

Preface:

This book is designed to guide and educate Prep pupils about the basic facts in computer.

The topics are presented in the simplest manner so that the reader will be able to grasp the facts and appreciate the learning process while enjoying himself.

After reading this worktext, the readers should be able to identify the basic parts and components of a computer. He should also know the advantages of each of these components as well as other details.

The joy of learning should not be kept to oneself only, but should not be kept to oneself only. It should be shared with others so that your joy would be multiplied twofold. So, come and learn the computer with me.
