

Journey through Language – Kinder

Author: **Angelita Tejuco, Elena del Rosario, Leonora Ramos**

ISBN: **978-971-649-120-4**

Copyright: **1995**

Preface:

This book is designed to suggest techniques and to enhance the communication skills of the young learner. The purpose of this book is a very direct and simple one. Logical sequence of activities and learning experiences are demonstrated to develop the ability important in the reading skills. Activities are presented in such a way that learning becomes fun, challenging and suited to the needs of the child. However, the teacher should provide an environment conducive for learning and children should be given a chance to practice English patterns and structures that will help them in the acquisition of reading skills. Moreover, the children need a lot of practice before they can develop the ability to express their ideas themselves, so the teacher should help them express themselves like in role playing and dramatization. Varied materials, approaches, methods and classroom organizations should be used by the teacher to help enhance the reading success of every learner.

Inasmuch that the motor coordination of the preschooler is still undeveloped, activities should be designed so as to give the learner the opportunity to express themselves through their movements and actions. Thus, close supervision and guidance is required to help small children finish their activities so that they will not be frustrated but instead, they will experience a feeling of success. The teacher should be creative and resourceful enough to meet the needs and ability of the learner by providing interesting activities which will be challenging and enjoyable to them. This activity book will aid the teacher in this respect.
