Preface:

Journey through Language (for Prep) is the third in the series and is designed especially for Kinder 2 pupils. It is a combination of textbook and workbook and it endeavors to supply the pupils with new as well as varied experiences.

With the belief that pupils will grow toward maturity and independence of thought as they progress in their learning, this book encourages them to do something with the experiences they will acquire here.

Basically, they are given models of expressions in this book so that their sensitivity to the beauty of the words and phrases will be stimulated.

The lessons here are treated logically, are truly realistic and are interwoven with Filipino values, for pupils to master the fundamental skills in communication namely: listening, speaking, reading and writing. It is fervently hoped that after going through the course, they will be able to learn to listen well, speak the language correctly, read with comprehension and finally, write effectively.
