ISBN: **978-971-649-116-6**

Copyright: **1995**

Foreword:

In this book you will encounter wonderful and meaningful concepts about your “world” which is yourself and the bigger world is your environment and all the things around you.

As the name suggests, it includes interesting activities to develop science-related skills, like observing, describing, classifying, comparing and contrasting, measuring, inferring, predicting and experimenting.

Lessons and activities are presented in a very simple way, structured carefully so they will not be too difficult nor too easy for a preschooler.
